HEALTH OFFICER'S REPORT

From Feb. 1, 1928, to Feb. 1, 1929, the following contagious diseases have been reported:

Scarlet fever, 4.

Measles, 5.

Whooping cough, 3.

Mumps, 2.

There have been approximately 150 cases of influenza.

Under the State Board of Health, division of Maternity and Child Welfare, the annual child health conference was held at Bowen hall. Dr. Robert Brooks of Claremont was the examining physician. Less than 15 children were brought for the yearly examination. It is a pity that every Charlestown parent of children under school age do not take advantage of this opportunity for health training. The yearly examination has a definite value for better health for our children.

In October, Dr. Charles Weaver of the State Board of Health, with the approval of the Superintendent of Schools, R. W. Gillmore, the Schick test was given to 124 children. At the reading but four showed positive reaction. All others were immuned to diphtheria.

Four analysis of the public water supply, both of the village and North Charlestown reservoirs, have been made during the year. The results in each case have been very satisfactory.

Several samples of milk from local dealers have been submitted to the State Laboratory for examination and the result in most cases has been satisfactory. Persons selling milk, even those who do not operate a regular route, should post themselves regarding the present milk regulations. Copies of the milk law and suggestions from the State Division of Sanitation will be gladly furnished without charge, on application.
